

Biography

Hans Friberg, MD, PhD, EDIC is a professor of Anaesthesiology and Intensive Care Medicine at Lund University & a senior consultant at Skåne University Hospital, Malmö, Sweden. Dr Friberg did his PhD-work at the Laboratory for Experimental Brain Research at Lund University, where he studied brain injury and mitochondrial dysfunction in rodent models of global and focal brain ischemia.

Dr Friberg's present research area is post-resuscitation care and temperature management after cardiac arrest and he has published more than 200 scientific papers in the field. He is a senior author of the Targeted Temperature Management after cardiac arrest trial (TTM-trial) and the subsequent TTM2-trial, published in June 2021. He is an initiator of the Hypothermia Network which has become the International Cardiac Arrest Registry (INTCAR), a transatlantic research collaboration with more than 6000 registered patients. He is the initiator of SWECRIT, a large regional biobank for critically ill patients in the ICU. Dr Friberg is a co-author of the European Resuscitation Council guidelines on post-resuscitation care and serves on the Board of the Swedish Resuscitation Council.
